IICRC Certified Water Damage Restoration Technician #236761  
IICRC Certified Applied Microbial Remediation Technician # 236761  
Licensed Florida Mold Remediator - #MRSR2750  
NORMI Certified

## Features of the mPALE with AEGIS Microbe Shield Technology

1. Improves the overall cooling performance of AC coils. Acts as a permanently bonded soil release agent, making coils easier to clean.
2. Registered with the EPA in 1976 (EPA Reg.# 83129-1). Manufactured by Dow Chemical
3. Features a unique "bonding" chemistry that mechanically punctures the cell wall versus a "leaching" process that works by releasing ionic free radicals that must be absorbed by the microbe in order to disrupt the cells lifecycle.
4. **Is odorless and colorless**
5. **PERMANENT**—once applied will endure for the life of the substrate and remains effective with normal housekeeping
6. Does not create mutant or adaptive organisms
7. Does not migrate off the surface
8. Does not affect the texture of the surface onto which it is applied
9. Dries within minutes of application (temperature and humidity may affect dry time)
10. Because it does not create adaptive organisms, it does not create "super bugs" that are resistant to antibiotics
11. Works across a broad spectrum of known bacteria, fungi, yeast and algae. \*See Partial Compendium
12. Used around the world in hospitals and cancer bone marrow transplant wings, commercial buildings, schools, residences, hotels, apartments and beach properties
13. Has been applied to the locker room/training room facilities at the University of South Carolina, Ohio State, Virginia Tech, Southern Illinois, Cal-State Fullerton, Swarthmore College, University of Tulsa, University of Southeastern Missouri, Grove City College, Thiel College, Xavier University, Southwest Wesleyan University and many others
14. Has been applied to the locker room/training facilities used by the Miami Heat, Cleveland Browns, Detroit Lions, Washington Redskins, Minnesota Vikings, Atlanta Hawks, Atlanta Thrashers, New Jersey Nets, Milwaukee Bucks, Orlando Magic and others
15. Required by Institutional Resources and approved by the Greenville County School District for application to all new school buildings prior to the students populating the buildings
16. Locally used by Northwood Realty, Fairview Swiss Cheese, Giant Eagle Get-Go, Montgomery Truss and Panel, Mercer County Court House, Venango County Prison, Farrell District Court, Grove City Hospital, Grove City Middle School,
17. Multi-year warranties provided and backed by an insurance company along with annual service
