Protect Your Boat and Yacht!

Permanent and Professional Protection for
 Private and Commercial Watercrafts

Environmental Solutions by Zingones

—www.stopZmold.com

Serving Grove City, Pa, Vero Beach, FL,
 and surrounding areas

The Problem

No matter the climate, boats, yachts, and private watercrafts are susceptible to mold and bacteria.

If untreated, this microbial growth leads to:

- Contamination of Equipment
- Deterioration
- Negative Publicity
- Health Risks
- Increased Insurance Rates
- Expensive Cleaning, Repair, and Replacement
- Potential Liability Issues
- Odors
- Viruses
- Allergens
- Mildew
- Mold
- Bacteria

Our Solution

The surface/product is treated with AEGIS Microbe Shield, which permanently bonds to that target using a patented chemical formula. It is microscopic, odorless, colorless, does not leach or bleed off of the surface, and dries to the touch within minutes.

AEGIS remains active for as long as the surface remains intact.

Benefits of AEGIS and the mPact Solution:

- Virtually Permanent Anti-microbial Protection for your Yacht and Equipment
- Environmentally Friendly Products
- Effective Against a Broad Spectrum of Microorganisms, including: Strep, Influenza, E. Coli, Salmonella, MRSA, and Norovirus
- Controls Bacteria, Mold, Mildew, Odors, and Allergens
- Reduces Liability Exposure
- Used in Hospitals, Daycare Centers, Schools, and Arenas World Wide
- Extremely Cost Effective

The Process

AEGIS Protection is applied in a two step process:

1. First is the cleaning, hand wiping, and disinfection of surfaces. This assures that all surfaces are free from contamination prior to treatment.
2. Second is Electrostatic Spraying, which employs electrostatically charged particles directed to the target surfaces using a specifically designed spray wand. This technique produces a micro-fine mist which finds its way into every crack and crevice, and provides a uniform coat to all surfaces.
